

How can this currency be useful for my association ?

The Ventureo project started in January 2018, the current step is to convince the associations to use this currency.

When a hundred or so associations have subscribed to this program, the members of these associations will be able to exchange goods and services in Ventureo.

For example, if the food truck Spirit of Geneva offers meals in Ventureo, and an association offering computer services is also involved in the project, a member of the computer association can consume meals by paying in Ventureo and selling IT services in Ventureo, the more the number of participants increases, the more the offer of service is important and the more the Ventureo increases in value;

The first participants carefully keep their Ventureo in their e-wallet until other organizations offer goods and services that interest them.
